DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claim 11 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Guillaume (4,110,036).
3. Guillaume discloses a housing assembly (36), a lamp (14), a condensing lens (10), an optical bench mounted within the housing (fig 1) comprises and elongate base (2,3) to which at least one clamp is attached to hold the lamp and the condensing lens (17), a light beam contour mask (cols.2-3 lines 64-67 and 1 respectively) and objective lens (21).

Allowable Subject Matter

4. Claims 1-10 and 16-21 are allowed.

5. Claims 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not disclose a contour light projector mask with a plurality of blades having a concave edge toward the central axis of the holding ring, one or more clamps comprising a strip folded to form at least five planes, a frame including an annular flange and two retainer walls extending perpendicularly to the plane of the flange and parallel to each other on opposite sides of the opening defined by the flange, a saddle including a cross member and two end walls extending perpendicularly to the cross member and parallel to each other at opposite ends of the cross member and a curved seat at the middle of the cross member on which the light projector may be selectively positioned and fixed to the saddle and a dual pivot system.
